## Amendments to the Specification:

Please replace the paragraph beginning at page 2, line 32 to page 3, line 7, with the following rewritten paragraph:

In an attempt to minimize some of the entry and exit issues, it was known to select an insert option from a menu bar of an application and the formula editor capability was opened so that the user could ~~and~~ insert ~~could~~ and edit a formula without leaving the application, only the menus and the object bars were changed.  After the formula editor capability was used to enter the data object, double clicking on the embedded object launched the formula editor capability so that the formula could be edited.  Again, this was done without leaving the application.
